## HOUSE OF THE MONTH

9 Millbank, Westminster, SW1

5 bedrooms, 7 bathrooms, 7,219 sq/ft

£27.5m

**In a sentence...** On the banks of the River Thames in the heart of Westminster, 9 Millbank is a landmark residential address that captures the essence of British luxury and style.

**What's the design like?** Studio Goddard Littlefair is behind the apartment's classically British interiors, pairing the architecture with an elegant palette of colours, materials and artworks.

**What's unique about it?** The ceiling heights. The developer, St Edward, has respected the proportions of the building, transforming a former boardroom into a dramatic six-metre-high reception room overlooking the river.

**Does it have any juicy history?**

9 Millbank was designed by Sir Frank Baines and constructed in the 1920s as the headquarters for Imperial Chemical Industries. It was requisitioned by the Government in 1939, with wartime figures including Lord Beaverbook and Vice-Admiral Sir Alfred Evans holding office there in the years that followed.

**What would parties be like here?** A members' club-inspired hideaway area with bar and games room is perfect for intimate soirées and cocktail parties.
